## Introduction

How do you go forth to present a new digital experience proposition to your board of directors or other senior stakeholders? The best bet is a business case.

With our checklist, we aim to guide you through all the steps in delivering a rock solid business case, with all the important aspects included.

So, go ahead and use the Digital Project Business Case Checklist for all it's worth.

Good luck!

Siw Grinaker Community Manager, Enonic

## What a business case is (and what it is not)

A business case is	A business case is not
<ul> <li>A short, essential document</li> <li>Purposeful</li> <li>Supporting business needs</li> <li>Overview of pros and cons</li> <li>Capturing both quantifiable and non-quantifiable characteristics of a proposed project</li> </ul>	<ul> <li>A lengthy treatise</li> <li>Dreamy stream-of-consciousness</li> <li>Supporting "cool" stuff</li> <li>Solely focusing on positives or negatives</li> <li>Only capturing quantifiable or non-quantifiable characteristics</li> </ul>

## The essential structure of a business case

The exact structure of a husiness case depends on the needs of

you pu	and your organisation. Check each section that fulfils a rpose for your organisation, and exclude the ones that don't alify.
	Executive summary Provide an essential overview of the issues you want to address, what goal you want to reach, what benefits your organisation can expect, and what specific actions will be performed.
	Situation Describe your current context, what challenges and opportunities it creates, what impact this has on your organisation.
	Benefits and limitations Present both financial and non-financial benefits of the proposal for your organisation, as well as any potential and actual limitations.
	Proposed solutions Identify potential solutions—i.e. CMSs or digital experience platforms—to your challenges, and provide substantial details for your stakeholders with a range of possible options.
	Impacts List what stakeholders and processes will be impacted by the solution, as well as detailing side-effects.
	Outline plan  Document the implementation approach, timeline, and required resources—all in logical stages.

# Market assessment Consider political, economic, sociological, technological, and legal factors in your industry, in order to demonstrate a thorough understanding of your key market. Governance Clarify project ownership, project leadership and management, as well as budget, oversight process, and reporting. Financial analysis Outline the forecasted costs and benefits, both total and spend profile over time—together with ROI and NPV. Risks assessment A more in-depth consideration of risks and limitations, where you can summarise all significant risks and opportunities, and how they will be managed.

Questions
☐ What is required?
☐ How is it done?
☐ Who does what?
☐ When will things happen?
— ······
Market assessment
Assess the following factors:
☐ Political
☐ Economic
☐ Sociological
☐ Technological
☐ Legal
Governance
☐ Project owner
☐ Project board members
☐ Project manager
☐ Compliance with wider governance and reporting in organisation
☐ Budget responsibility
General oversight responsibility
☐ Process oversight responsibility
Reporting responsibility
Financial analysis
☐ Forecasted costs
• Total
<ul> <li>Spend profile over time</li> </ul>
☐ Benefits
• Total
Profile over time
☐ Return on investment
☐ Net present value
Payback calculations
Special issues to consider:
☐ Capital expenditure vs. operational expenditure
☐ Project vs. operational costs
☐ Planning horizon
Sensitivities
☐ Role of the financial department

## **Risk assessment**

### Risks

- ☐ Forecasted costs
- □ Total
- $\square$  Spend profile over time

## **Opportunities**

- $\hfill \square$  Identify potential opportunities
- ☐ Potential consequences
- $\square$  How to take advantage of opportunities?

## **CASE STUDY**

## How \$80BN financial services company KLP chose a digital platform for the future

KLP needed a platform that was faster, better, and more secure than their current solution.
